

AIRWAY MANAGEMENT MADE SAFER AND EASIER

Rapid Airway Management Positioner™ - also known as the **"RAMP"** - is an FDA registered, cost effective, single patient use, inflatable positioning device to facilitate endotracheal intubation and provide a customized view of the laryngeal anatomy.

Portable Handheld RAMP Controller - Coming Soon!

INTRODUCING THE

RAMP

RAPID AIRWAY MANAGEMENT POSITIONER™

A Best Practice Solution

- ▶ Utilizes hospital air
- ▶ Allows for independent control (inflation and deflation) of each RAMP chamber
- ▶ Emergency dump valve for CPR
- ▶ Solid one piece aluminum housing - not plastic!

Experts agree that ear to sternal notch positioning is the optimum position for airway management. Ramping improves upper airway patency, decreases the work of breathing and prolongs the safe apnea period. The Rapid Airway Management Positioner™ provides these benefits and is superior to conventional positioning solutions.

PPS Is On Target With This Innovative Solution For Airway Management

BENEFITS OF THE

RAMP

RAPID AIRWAY MANAGEMENT POSITIONER™

CLINICAL ADVANTAGES

- ▶ **Customizable:** Existing foam based solutions are cumbersome and cannot be uniquely configured
- ▶ **Speed:** Positioning can be achieved quickly
- ▶ **Safety:** Can be rapidly implemented at any time during the perioperative period, intubation and extubation
- ▶ **Disposable:** Eliminates risk of cross contamination/infection. Saves time on cleanup
- ▶ **Portability:** RAMP cart has a small footprint and can be readily transported throughout the hospital. Everything stored in one location

ECONOMIC ADVANTAGES

- ▶ **Cost of Use:** Costs comparable to using blankets and existing foam based solutions .
- ▶ **Disposable:** No need for cleaning or processing after use. Can be recycled.
- ▶ **Risk of Work Related Injury:** Health care professionals do not need to lift/handle the obese patient.
- ▶ **Smaller Inventory Footprint:** Single use product resides on a mobile cart. No need to store or handle bulky foam based solutions.
- ▶ **Lower Shipping Costs:** Compact packaging and a slender profile means more economical shipping fees.
